Art Unit: 3632

This is the fifth office action for serial number 09/822,154, Suction Cup Holder, in response to RCE filed July 17, 2003.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 and 11-15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for first pair of horizontal wire and second pair of wires defining a generally horizontal rectangular opening, does not reasonably provide enablement for first pair of horizontal wire and second pair of wires defining a generally vertical rectangular opening. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3632

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the limitation "rectangular opening" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 11, 12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Raphael 3,181,702. Raphael discloses a first pair of horizontal wires (39 and 41), a second pair transverse wires (96), the wires defining a generally vertical rectangular opening (see attached figure), a suction cup with a head and a neck), two fastener arrangements (where the wires are attached to the fixture), and a fixture

Art Unit: 3632

(50, 42, 43, 51, 52, 47, 48 and 53). The horizontal wire (41) retains the neck of the suction cup (66) within the opening. The wires are attached to the fixture by welds or at least one brazing(column 2, lines 56ff, where 52 and 53 are attached to 39 and where 47 and 48 are attached to 41).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5, 13, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raphael 3,181,702. Raphael discloses all of the limitations of the claimed invention except for the fastener arrangement being fastened to the fixture by soldering or adhesive. The further limitation of the device being fastened to the fixture by soldering or by adhesive is a design choice and the applicant did not disclose any reason for why the device and the fixture critically had to be fastened with one of those techniques. Therefore, it would have been

Art Unit: 3632

obvious to one having ordinary skill in the art to have chosen to use the well-known techniques such as soldering or by using adhesive in order to securely fix the device to the fixture.

Raphael provides motivation or suggestion for such a modification clearly in column 2, lines 54, which states "the connection preferably is by welding, although the connection may be made by brazing or by other conventional connection means".

Allowable Subject Matter

Claim 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose an assembly comprising in combination a fixture, a device, and a suction cup comprising a generally rectangular structure having two vertical sides, two horizontal sides and four rounded corners; at least two fastener arrangements fastening each vertical side of the rectangular structure to one parallel vertical wire so that the horizontal axis of the rectangular structure is perpendicular to the vertical wires.

Art Unit: 3632

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly Wood whose telephone number is (703) 308-0539. The examiner can normally be reached on Monday-Thursday from 7:30 AM to 5:00 PM. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-2168.
